Take a plunge into the mesmerizing aquatic world of the Malatu Reef, where the warm embrace of the Red Sea holds the key to two thrilling dive sites. Both these sites capture the essence of Malatu Reef's dynamic underwater topography, and the colourful marine life that calls it home. Beginners, advanced, technical divers and freedivers will find a unique, underwater spectacle at Malatu Reef.

In the first site, divers will venture into an enthralling paradise of towering spires of hard coral and soft swaying fronds, teeming with a vast array of vibrant marine life. The site starts at the coral-encrusted wall on the reef's left side, descending to 35m.

Immerse yourself in the vivid display of the reef's residents, like the red coral groupers, known for their striking colours and broad, flat heads. Keep your camera ready to capture their delightful play amidst the rocks.

The shallower area, northwest of the main reef, offers a spectacular maze of small coral heads and dense thickets of Acropora, the fast-growing, antler-like coral. This area hosts a variety of fish and invertebrates, offering a kaleidoscopic view of this bustling ecosystem.

At the second site, divers can experience t
